

## ENVIRONMENTAL Policy of MARBELIZE S.A

ESP-GG-08 / VERSIÓN: 2 / FECHA: 20-04-2026

MARBELIZE S.A. is a company dedicated to the processing and export of frozen tuna products, frozen precooked products, sterilized canned products, and value-added products. The company conducts its operations under a responsible, sustainable, and continuous improvement management approach, recognizing its responsibility toward environmental protection, the efficient use of energy and natural resources, climate change mitigation, the conservation of marine biodiversity, and the well-being of the communities with which it interacts.

In carrying out its activities, MARBELIZE S.A. acknowledges that its operational processes generate environmental impacts associated with the consumption of electricity and fuels, greenhouse gas emissions, water resource usage, the generation of waste and hazardous waste, effluent management, as well as fishing and raw material sourcing activities. In this context, the organization is committed to preventing pollution, systematically controlling and reducing its environmental impacts, and continuously improving its environmental, energy, and climate performance by integrating a life-cycle approach, risk and opportunity assessment, and decision-making based on performance indicators.

MARBELIZE S.A. is committed to strict compliance with applicable environmental, energy, and climate legislation, as well as other voluntary, contractual, and customer requirements at both national and international levels, ensuring that these commitments serve as the framework for establishing, monitoring, and reviewing its environmental, energy, and climate objectives.

The organization promotes the efficient and responsible use of energy, water, and fuels by prioritizing the optimization of production processes, the progressive reduction in fossil fuel consumption, the implementation of renewable energy sources, including solar power generation projects, and performance monitoring through operational indicators, with the aim of reducing its environmental footprint and improving operational efficiency.

MARBELIZE S.A. comprehensively manages its greenhouse gas emissions, recognizing climate change as a strategic environmental aspect, through the measurement, monitoring, reporting, and progressive reduction of direct and indirect emissions, establishing baselines, intermediate objectives, and reduction targets aligned with international best practices and stakeholder expectations.

Likewise, the company promotes the responsible and efficient use of water resources, ensuring the proper treatment of all wastewater, encouraging water reuse and consumption optimization initiatives, and preventing negative impacts on receiving bodies and surrounding communities.

Regarding waste management, MARBELIZE S.A. prioritizes prevention and minimization at the source, circular economy practices, recycling, and the environmentally sound management of waste and hazardous waste, establishing operational controls to ensure safe handling in compliance with current regulations.

The organization promotes responsible sourcing and sustainability practices throughout its supply chain, prioritizing raw materials obtained from legal, responsible, and sustainable sources, thereby contributing to the conservation of marine ecosystems and the sustainability of fishery resources.

MARBELIZE S.A. encourages the continuous training and awareness of its employees and stakeholders in environmental, energy, and climate best practices, promotes transparent communication with interested parties, promptly addresses community concerns, and ensures that this policy is communicated, understood, implemented, and made publicly available.

Senior Management leads and supports the implementation of this policy by ensuring the allocation of the necessary resources and its periodic review, in order to guarantee its ongoing suitability to the organization's context, corporate strategy, and long-term sustainability vision.
